Gen X: The "Prince Charles Generation"

MetLife Mature Market INSTITUTE

The Growing Aging Workforce: Possible Consequences

- Block promotions for younger workers
- Higher health and disability costs
- Skill obsolescence
- More unemployment among young

- More engaged and loyal workers
- Stimulate new job configurations
- Greater opportunity to save for retirement
- More money into government programs

Older or Younger Boomers – Different Strategies Needed

Biggest Concern Regarding Retirement*

INSTITUTE

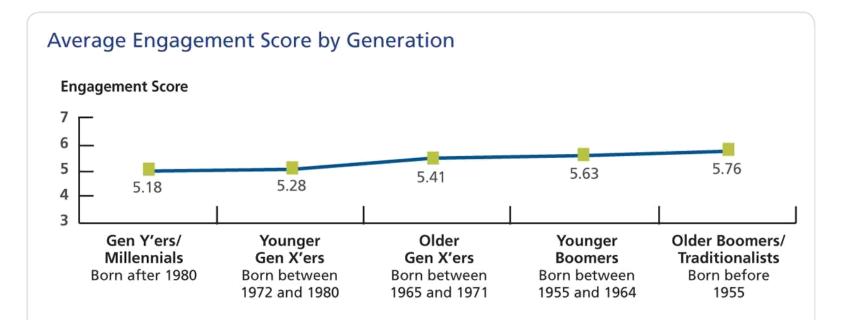

Source: Boomer Bookends, MetLife Mature Market Institute, February, 2009

How Much is Enough?

- Do the more affluent workers stay on even if they have enough?
- Do workers know what is "enough"?
- If workers leave the workforce involuntarily, can they survive?
- Can people scale back and still have a good retirement?
- Do higher education and white collar jobs enable workers to stay on?
- Will better health habits impact workforce
 Iongevity?

If Older Workers Stay on, How do we Keep the Generations Engaged?

Note: There was a statistically significant difference at the .95 level between Younger Boomers' scores on engagement when compared to Gen Y'ers/Millennials', Younger Gen X'ers', and Older Gen X'ers' scores. Likewise, there was a statistically significant difference between Older Boomers/Traditionalists' scores when compared to these three groups. In other words, these differences would occur by chance less than 5 in 100 times.

There was no statistically significant difference between Younger Boomers' scores and Older Boomers/Traditionalists' scores or between Gen Y'ers/Millennials', Younger Gen X'ers, and Older Gen X'ers' scores.

Using Benefits as a Tool

Participation in flexible arrangements varies by generation

MetLife Mature Market INSTITUTE

Tuning into Employee Life Stages Can Impact Employee Health and the Bottom Line

Caring for Aging Parents – An Example

- Average additional health cost to employers is 8% more for those with eldercare responsibilities (\$13.4 billion a year)¹
- Lost productivity of caregivers costs employers
 \$2,110 per employee per year (\$33.6 billion)²

Sources: ⁽¹⁾ The MetLife Study of Working Caregivers and Employer Health Care Costs, MetLife Mature Market Institute, 2010; ⁽²⁾ 1The MetLife Caregiving Cost Study: Productivity Losses to Business, MetLife Mature Market Institute, 2006

Creating Generational Harmony While Maintaining Engagement and Productivity

- Make sure mid-career workers have training to prevent obsolescence and maintain engagement
- Follow the "waves" in the life cycle to meet needs of young mothers, empty nesters, older workers
- Develop policies so older workers can phase into retirement
- Consider lateral moves for younger workers so they can gain skills to use later
- Provide help with life's stressors including financial stress

Retirement Income Planning is Key to Alleviating Fear of Running Out of Money

- Decrease in risk tolerance is accompanied by increased preference for income guarantees in retirement.¹
- Confidence in retirement security most strongly related to the sufficiency of a guaranteed income stream (68%) and adequacy of savings (57%).²
- Having a contingency financial plan creates confidence about outliving income. ³

Put a Focus on Women – Even those Who are Managers and Professionals

- Better education
- More resources
- Confident in managing money

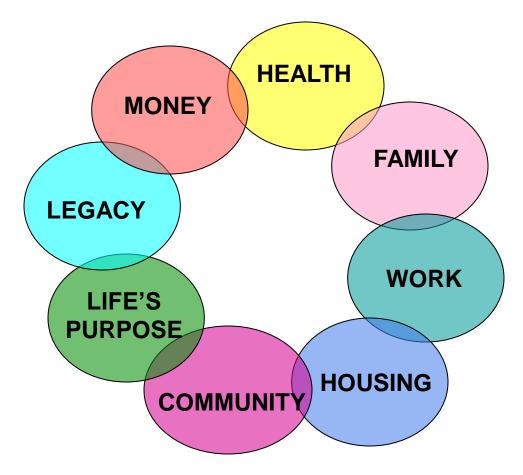

- Still "sitting on the sidelines" in terms of investments
- Significant concerns about retirement finances
- Many are heads of households
